# The net zero movement

## What does net zero mean?

- Net zero means that the balance between greenhouse gas (GHG) produced and removed from the atmosphere is zero; it looks at emissions minus carbon sink efforts.
- Over the past decade, global emissions have risen steadily.
- To have any hope of keeping temperature rise to 1.5C **we need to halve emissions by 2030 and reach net zero by 2050.**
- Doing this requires us to reduce emissions by about 7% per year. Business as usual is not an option.

# The net zero movement

## What is GFANZ?

I recently launched the Glasgow Financial Alliance for Net Zero, which seeks to broaden, deepen and raise ambition in the financial sector, and allow firms to demonstrate their collective commitments to supporting companies and countries to achieve the goals of the Paris agreement. In the coming months, GFANZ will work with the UN Race to Zero campaign to ensure that all subsectors of the financial sector have credible net-zero commitments.

# The net zero movement

- The SSE calls on exchanges to express their interest to be involved in the net zero movement.
- To become part of the “Race-to-Zero”, the Glasgow Financial Alliance for Net Zero (GFANZ) offers the best possible option for exchanges to make an official commitment.
- The SSE can provide assistance for exchanges wishing to join the GFANZ network.
- If your exchange wishes to learn more or make a commitment to net zero, feel free to contact the SSE team at: [climate@sseinitiative.org](mailto:climate@sseinitiative.org)
